

# Web Development Release Log

2021-04-15

## National Release

### Bug Fixes

- Survival by degrees anchor landing page link issue
- Fix for php notices
- First article in Popular Stories feed has inaccurate link

### New & Improved

Accessibility enhancements to the Audubon for Kids Page (Improved readability of links, adding hover effects, improved keyboard navigation of videos, and more)

UI & code enhancements to support improved web accessibility. Including:

- Brand Colors
  - Updates to Redbreast and Peacock blue for improved accessibility (color contrast)
- Title fonts
  - Introduced a softer black #404040
- Homepage Curtain
  - Hover effect on title changed from underline to color change, consistent with editorial & engagement cards
- "Mega-nav"
  - Fonts in the dropdown menus are now consistent with our new pattern of links having a heavier font weight, and static labels having a lighter font weight
- Editorial Cards
  - Elevation effect on hover and updated focus ring enhances overall "card" look and feel.
  - Hover states changed from underline of title to color change
- Engagement Cards
  - Elevation effect on hover & updated focus ring
  - Add static label for "Email address" on engagement cards with email form fields (WCAG accessibility requirement)
- Bird Cards
  - Elevation effect on hover matches editorial and engagement cards
  - Improved screenreader accessibility by reordering images, text and adding prefacing Latin species name with "Latin".
- Social Icons
  - Updated default and hover colors of social icons

2020-09-10

2020-08-26

## National Release

### New + Improved

- Editors now have permission to 'New Header Menu Configuration' for editing new nav menu content including "take action" screen: <https://www.audubon.org/admin/config/system/new-header-menu>
- Ability to use Nodequeue to manage Take Action menu "cards" with ability to edit display title and market source on config page (See detailed instructions below)
- Improved cache clearing after updating a page

## Bug Fixes

- Fixed some console errors to improve performance
- Fixed issues on About Us page related to disabling other menu items

### Instructions for using Nodequeue for managing Take Action Cards.

#### 1. 1. Manage nodes to be displayed:

- Go to: <https://audubon.org/admin/structure/nodequeue/19/view/19>
- Recommended workflow from admin page:
- Remove a node
- Add a node
- Re-order nodes
- Click "Save"

#### 2. Optional Step- Update Header Title + Market Source Links

- Go to: <https://www.audubon.org/admin/config/system/new-header-menu> (Take Action Tab)
- Fill "[ordinal\_of\_node] header title" / "[ordinal\_of\_node] button link" if need

#### 3. In order for changes to take effect:

- Go to: <https://www.audubon.org/admin/config/system/new-header-menu>
- Click "Save Configuration"
- Click "Clear Menu Cache"

2020-08-06

## National Release

### New + Improved

- Bird nodes can be toggled to not display a card in the Bird Guide Grid, in the event that the bird node doesn't have an image

### Bug Fixes

- Removed extra white padding from Inca Dove page
- Removed cards with no images from Bird Guide Grid
- Assorted code errors resolved

## State/Center Release

### New + Improved

- New feature that allows state sites to hide the State Label on events
- New user role available on ASC sites that allows user to see all unpublished nodes

## Backlog Release

### Completed

- Considerations for AMP styling reviewed and approved
- Twitter card images initially don't appear in preview if they're being created from a large hero image - no bug found
- Spacing between curtain ad text and CTA button reviewed and resolved

2020-07-30

## National Release

### New + Improved

- New user role on NAS created to view all unpublished nodes

### Bug Fixes

- Position of photo credit on hero images on Bird Guide pages has been corrected
- Curtain and Language Switcher repaired for logged-in users after clicking 'Customize This Page'
- New Relic issues patched and ctools module updated

2020-07-22

## National Release

### New + Improved

- New/improved .csv export content for bird node export
- Consolidated 'English' and 'Neutral Language' node options to prevent duplicate content
- 'Back to Origin' button on map now only appears if the user has interacted with a map in a way that changes its orientation/zoom

### Bug Fixes

- Repaired corrupted button style on ES language version of Survival by Degrees
- Repaired styling that had scientific bird name overlap content below it on Bird Guide views
- Eliminated functions that were producing duplicate bird and copy content

2020-07-16

## State/Center Release

### New + Improved

- Improved styling and spacing for hero images - New Mexico site

### Bug Fixes

- Repaired corrupted styles for donation forms - California site
- Repaired donate button with excessive symbols - New Mexico site
- Repaired Native Plants form styling - New Mexico site

2020-07-09

## National Release

### New + Improved

- Custom field for ZIP code validation messaging now operational in admin
- Translation byline added to articles with translations
- Significant performance improvements made to AWS based on Pantheon suggestions
- Styling improvements made to Native Plants search results page
- References to the cdn.audubon.org subdomain have been cleared from the database

### Bug Fixes

- Engagement cards fixed to only display photo credit, rather than credit and caption
- Issue where signed-in users are unable to see dropdowns in menu after cancelling 'Customize This Page' has been resolved

2020-07-01

## State/Center Release

### Bug Fixes

- Issue where horizontal slideshow images covered over the Popular Stories block on news articles has been resolved
- Bird Feed importer patched and now shows all bird card images
- Issue where bird card images weren't centered vertically has been resolved

2020-06-25

### New + Improved

#### NAS

- Link to Spanish Language versions of pages with a published translation now appears under article bylines

### Bug Fixes

#### NAS

- Pause button in BOA cards has been replaced to its correct location
- Issue with share block being partially obscured on ES language news pages has been corrected

#### NAS/ASC

- Feed issue causing missing bird card images on national, state and center sites has been patched

## 2020-06-17

### Bug Fixes

#### NAS

- Related Stories block fixed - is now appearing as expected
- Bird song files that hadn't been playing properly have been fixed
- Issue involving audio file upload in the editor interface has been resolved

#### ASC

- Pause Icon on Bird Song Audio block repaired
- Issue causing images of birds in Birds in this Story column to clip or not render has been fixed

## 2020-06-11

### New + Improved

#### NAS

- Zip Code verification and validation for Native Plants search prevents empty or incorrect results
- Climate site mini search widget added to bird guide pages
- Performance improvement when updating connected English language and Spanish language node

### Bug Fixes

#### NAS

- Pause button placement on bird song play buttons corrected in Bird Guide
- Unsuccessful event imports affected by errors in their logs have been corrected (errors amended and imports resumed)

#### ASC

- A handful of problematic State/Center site event pages no longer displays a blank page (events now show up as expected).

## 2020-06-03

### New + Improved

#### NAS

- Migration to Amazon S3 is complete, offering improved image storage and performance, and improving slow-downs related to image uploading.
- Improvements to how Pages are handled throughout the site are now live, allowing them to be added to the site taxonomy and to editorial card fields
- New native Drupal CTA Curtain now available for the Homepage, for donation and action prompts
- Updates to Survival By Degrees site maps.

#### ASC

- Time Zone for Events is now displayed by default.
- Image captions have more space added between them and their associated images.
- Slideshows now have more space between them and any copy immediately subsequent on the page.

#### Works

- iCal feed for public events on national and state/center sites is available for staff use.
- We can now support Chapters as locations for events, and can sync them to State/Center or the NAS Events page

### Bug Fixes

## NAS

- Bird Song player no longer launches a sound file page for users - the audio file is played on the page after click without redirect or reload.
- If a Photo Gallery is empty on a Bird Page, the empty Gallery space on the page no longer displays by default.
- An issue with Spanish translations deleting English content has been resolved.
- Bird Images are now automatically updated and synced between Spanish and English versions of the same page.

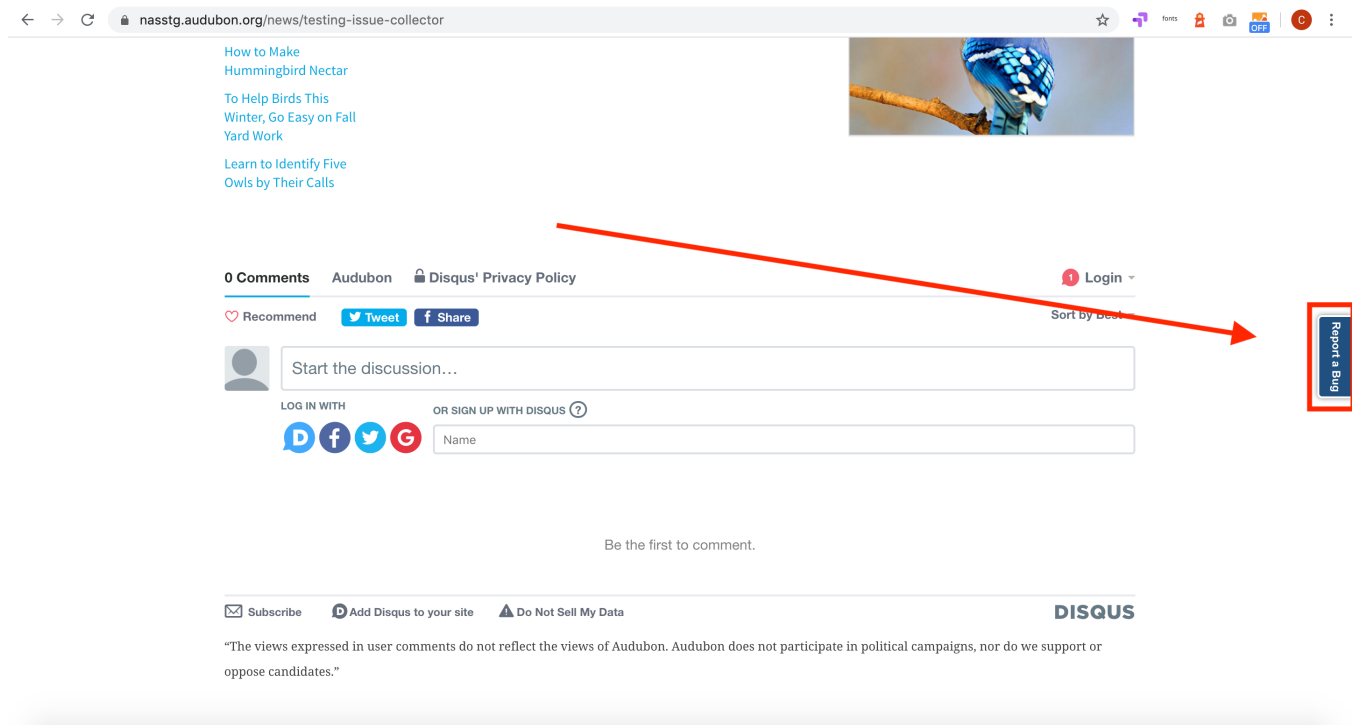

## ASC

- "Birds in this Story" text overlap has been corrected on mobile.

2020-05-05

## New + Improved

- "Report a Bug" bug reporting form was launched for all Audubon State and Center (ASC) Sites. This new tab will appear on all pages of your site **when logged in**. **All issues with your website should be reported using this form**. In addition to streamlining the bug reporting process, this form will provide the IT + Product teams with more details to resolve issues faster.
  - For an example of a completed bug report, see example here: [How to get help](#)

2020-04-22

## Bug fixes and improvements to Online Events functionality

### New + Improved

- Audubon Locations filters added to [www.audubon.org/events](http://www.audubon.org/events)
- Updated Role permissions so users with access to a location can edit events associated with the location, instead of just the event creator

### Bug Fixes

- Event description text formatting bug fix for event detail page
- Filters are working for locations on [www.audubon.org/audubon-near-you](http://www.audubon.org/audubon-near-you)

2020-04-14

## New + Improved

### Support for Online Events across Audubon Works, Audubon State & Center Sites (ASC) and Audubon.org (NAS).

For detailed information on creating/editing and syncing events to ASC sites & NAS, refer to the updated Web Knowledge base post: [How to load Events for ASC & NAS Events Calendars via Audubon Works](#)

- Ability for Editors across the Network (ASC & NAS Sites) to create or edit existing events and tag them as "Online," "In-Person," or "Both" from Audubon Works. Additional fields added to support Online Events include:
  - Cancelled Event
  - Hide from audubon.org
  - Event Category
  - Event Time Zone
  - Event Platform
- A new [All Events](#) page on NAS that includes all events occurring across the network. This will be filterable by "Online" "In-Person" and "All Events." Each event will link out to an Event Detail Page on the Audubon State or Center site hosting the event, or the [Audubon.org](#) site if the event is hosted by NAS.
- All Events occurring by State on the [Audubon Near You Page](#). This also includes some additional UX/UI improvements to the presentation of Office/Chapter & Center/Sanctuary information.

2020-03-19

## New + Improved

- Editing engagement cards on articles (Add engagement card reference field to articles on state/center) (1946) *New Feature*
- Port "Menu Bar Section" Feature to ASC Sites (1951) *New Feature*
- Users should be able to select menu to populate "Menu Bar Section" (1959) *New Feature*

## Bug Fixes

- Increase character count for 'run events sync on works' machine name field (1904) *Bug Fix*
- Slideshow counter (X of Y) is not in correct position (1963) *Bug Fix*

## Notes

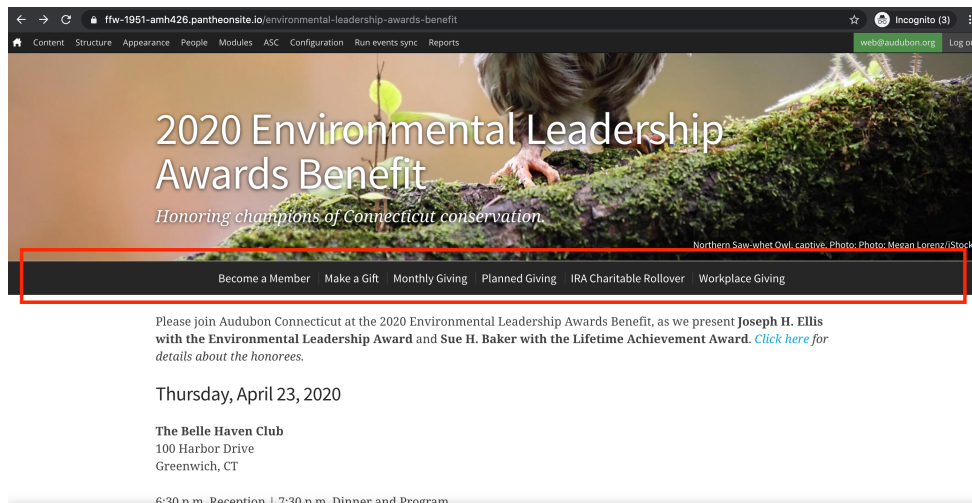

### Editing Engagement Cards on Articles (1946)

Users now have better control over Engagement Cards appearing on article pages

- From **Edit > References > Engagement Card**, users can select an engagement card which overrides any other matching from the engagement cards nodequeue or taxonomy.

The screenshot shows the 'Edit Article New Habitat Hero' interface. On the left sidebar, the 'References' tab is selected and highlighted with a red box. Below it, the 'Engagement card' option is also highlighted with a red box. The main content area shows the 'Category' dropdown set to 'Habitat Hero' and 'News'. Below this, there are sections for 'Related content' and 'Internal tagging'. At the bottom, the 'Engagement card' section is visible, showing a list of available cards with a search bar and a 'Show row weights' link. The cards listed include 'Habitat Hero Blog', 'Apply for Habitat Hero Certification', 'Don't Inland with Habitat Hero Award!', 'Habitat Hero Blog', and 'WRAN and Habitat Hero Webinar-Water Wise'. The 'Habitat Hero Blog' card is currently selected.

## New "Menu Bar Section" feature for landing pages (1951).

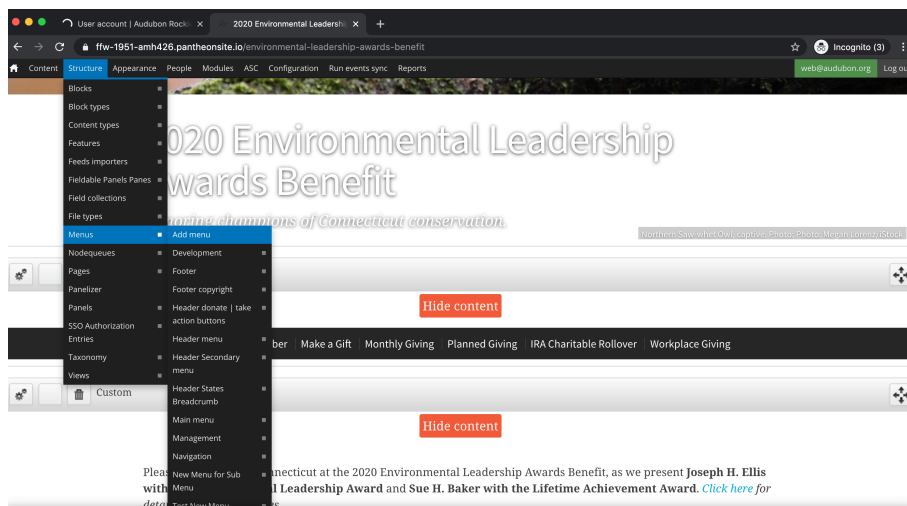

The "Menu Bar Section" panel can be added to landing pages. See example of the [NAS Western Waters Landing Page](#), to see a nice example of how content can be structured using this feature.

A few notes:

- If the menu links do not already exist, users must first create the menu links in **Structure > Menus**, so they can be selected in the "Menu Bar Section" panel.
- Users can create either create a new menu, or add links to an existing menu.
- If links are intended to only appear in the "Menu Bar Section", ensure the checkboxes for "enabled" are unchecked so these links do not appear live in other menus.

Step 1: Create a new menu or add/edit links in an existing menu. If you want the links to only appear in the Menu Bar Section, and not appear in the selected menu, make sure the checkboxes for "enabled" are unchecked.

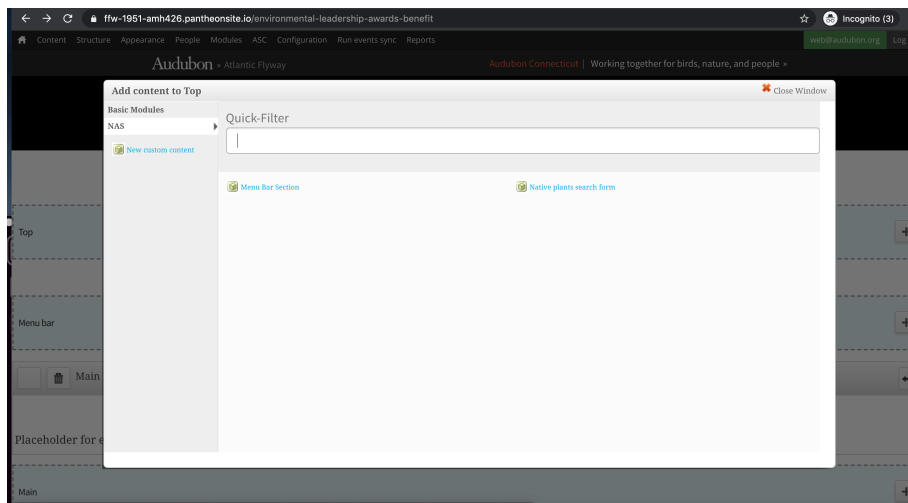

Menu link	Enabled	Operations
+ About Us	<input checked="" type="checkbox"/>	edit delete
+ State Overview	<input checked="" type="checkbox"/>	edit delete
+ Mission & History	<input checked="" type="checkbox"/>	edit delete
+ Staff & Contact Info	<input checked="" type="checkbox"/>	edit delete
+ Centers, Sanctuaries, & Chapters	<input checked="" type="checkbox"/>	edit delete
+ Equity, Diversity, and Inclusion	<input checked="" type="checkbox"/>	edit delete
+ Board of Directors	<input checked="" type="checkbox"/>	edit delete
+ Careers	<input checked="" type="checkbox"/>	edit delete
+ Support Our Work (disabled)	<input type="checkbox"/>	edit delete
+ Become a Member (disabled)	<input type="checkbox"/>	edit delete
+ Make a Gift (disabled)	<input type="checkbox"/>	edit delete
+ Monthly Giving (disabled)	<input type="checkbox"/>	edit delete
+ Planned Giving (disabled)	<input type="checkbox"/>	edit delete
+ IRA Charitable Rollover (disabled)	<input type="checkbox"/>	edit delete
+ Workplace Giving (disabled)	<input type="checkbox"/>	edit delete

**Note: unchecked links will not appear in the selected menu, but will be available to display in the "Menu Bar Section" feature**

Save configuration

Step 2: Add "Menu Bar Section" to a Landing Page from **Customize Display > NAS > Menu Bar Section**

Step 3: Choose a menu and default menu item links from the dropdown menus

### Configure Menu Bar Section

Select menu

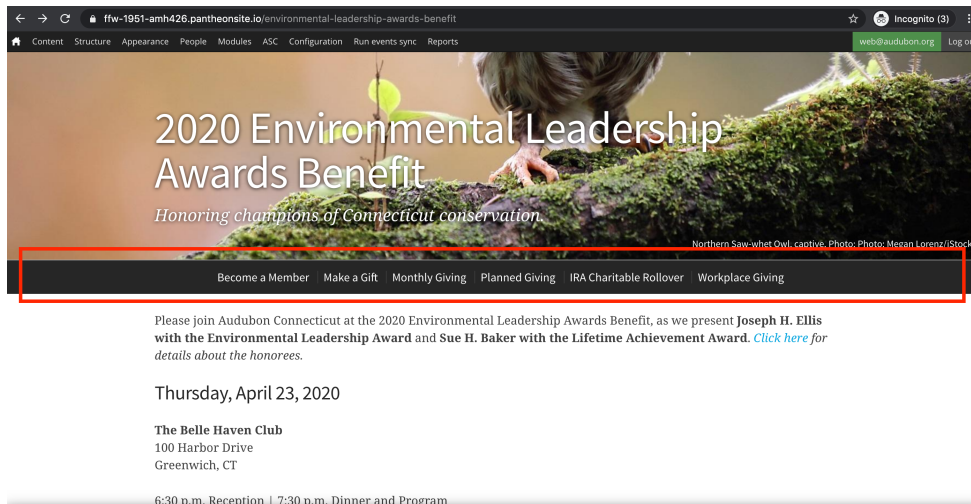

menu-header-main-menu

Default menu item

-- Get Involved

Finish

Cancel

2020-03-10

## Bug Fixes

- Styling issue with long caption/credits (1952)
- Caption/credits not appearing on mobile (1953)

2020-02-28

## New + Improved

- Images uploaded as slideshows can now be displayed "stacked on top of each other" (useful for adding multiple images to an article) - See screenshots below for instructions and example of this layout. New Feature (1947)

## Bug Fixes

- Fix Native Plants search widget form field alignment. Bug Fix (1901)
- Slideshow images are displayed in full size, eliminated any cropping issues. Bug Fix (1909) Note: There is an outstanding known issue with credits not appearing on mobile and some spacing issues occurring with very long captions - this will be resolved next week.
- When editing or removing engagement cards ("Engagement cards. Sidebar") from an article, image caption/credit and spacing issues no longer occur. Bug Fix (1931)
- Eliminate H5P Errors on Hog island Site. Bug Fix (1939)

## Notes

### Images "Stacked on Top of Each Other" Feature (1947)

From **Block Insert > Slideshows**, users can can upload multiple images to appear "stacked on top of each other" in an article.

Step 1: Editing an existing Slideshow so images appear stacked on top of each other

## Editing an existing slideshow to stack images

Click "Browse" to locate the file on your computer or in the site's File Library. [Show row weights](#)
